# Voter Registration Audit Methodology

# What is the Purpose of VRA?

- To provide an independent election observation report
- To verify the accuracy of voters list
- To evaluate the quality of voter registration process

# Methodology

- 380 communes randomly selected – *multistage stratified random sampling*, with  $\pm 3.5\%$  of margin errors and 95% level of confidence.
- VRA conducted with *two-way audit*:
  - a. *List-to-people* – selected 4 names on the voter list and then interviewed them to verify their data in each commune
  - b. *People-to-list* – selected and interviewed 6 voters and then verified their data on the voter list in each commune

## Data Collection

- NICFEC and COMFREL deployed 385 volunteers on August 10-14, 2007
- Total sample received from communes: 380 communes (98.7% of target sample communes) from 24 provinces/municipalities
- Number of respondents: 3,796 voters (98.6% of target sample)
- The voters list audited is the 2006 voters list (the list used in the 2007 commune council elections)

# Recommendations for NEC

1. Continue with registration update plans and prioritize enumerating unregistered voters. Pay special attention to specific groups such as male voters, young voters, and relocated voters.
2. Better to err on the side of caution and refrain from deleting voters who reside outside their commune and may or may not be registered in a new location
3. For the deletion of names, reverse the burden of proof to rest with NEC and not the voter. In other words, accept only concrete evidence as proof of invalidity prior to deletion rather than delete if voter does not check. For example: deceased voters should only be deleted with proof of death certificate.
4. Use the 2007 commune council election polling stations records to cross-check the deletion list.
5. Make registration procedures easier to understand and easier to fulfill. For example: reduce requirements for completion of 1018 form.
6. Increase effectiveness of voter education programs by using electronic media

# Recommendation to Government

1. Complete the distribution of National ID cards preferably before September 15.  
Release information on the statistics of National ID cards issued and distributed.
2. Prioritize the first time voters to get their National ID cards
3. Cooperate and assist NEC to ensure the neutrality of the village chiefs

## Recommendations to Political Parties, Civil Society, Media, and the International Community

1. Encourage voters to check their registration status or register themselves starting on September 15 – October 20, 2007.
2. Monitor the registration updating process and pay particular attention to relocated voters, deceased voters, and unregistered voters
3. Use electronic media for effective dissemination of information on voter registration.
4. International community is encouraged to support financially and technically.
